Crystal Pro Cabinet Color

Form 2004001

As part of the on-going changes and updates to the Crystal Pro cooler, Crystal Mountain will be changing the color of the Crystal Pro from the current version (on the left, below) with Gray front panels to a version with black front panels (on the right, below). The side panels will remain black on both versions. This change will take place in production once stock is depleted. The affected cabinet panels will continue to be available in gray. The new parts in black will be stocked as they become available.
