## Two Piece Back Panel—Storm Family

Form 2009003

As part of its program of continuous improvements, Crystal Mountain has made changes to the construction of the rear panel used on the Storm family of coolers. Whereas the panel was previously one large piece, it is now two pieces. As part of this improvement, the handle was changed and lowered to make it easier to use. This change was due, in part, to requests from our customers and service providers. While, these parts are compatible with previous versions of the Storm, in order to use the panels on an older version of the Storm, it will be necessary to use two of the rear panel adapters (see part numbers below) for proper installation.

Once the inventory of the older style parts is depleted, this change will take place in both new production as well as service parts.

Rear Panel Replacement Kit.....	SUB-C200780
Contains handle, adapters, top and bottom panels	
Panel, Top Rear.....	PLC-C150195
Panel, Rear Lower.....	PLC-C150196
Adaptor, Rear Panel.....	PLC-C150198
Handle.....	PLC-C150197

If you have further questions, please contact your Crystal Mountain representative.
