Changes to Brew Selection Options on Storm Café

Form 2102001

As part of its policy of continuous improvement, Crystal Mountain is changing the Brew Selection options on the Storm Café water and coffee unit. Previously the brew selection settings allowed for 8, 10, or 12 oz selections. This is being changed to 6, 8, or 10 oz options. This change will take effect once the supply of the older style parts are depleted at the factory (approx. May/June 2021). A supply of the older style top assemblies will be set aside for service parts. Part numbers for the old and new versions are below.

SUB-C200722 Top Cover Assy—8, 10, 12 oz selection sizes—original version

SUB-C200839—Top Cover Assy—6, 8, 10 oz selection sizes—updated version
